PROFESSIONAL SUMMARY

Results-driven Backend Software Engineer and Technical Lead with over 3 years of experience in designing scalable architectures, RESTful APIs, and robust system infrastructures. Demonstrated success in leading engineering teams of up to 15 members and deploying 55+ production projects handling up to 10,000+ concurrent users. Proficient in modern backend frameworks (**NestJS**, **Laravel**, **TypeScript**) with deep expertise in optimizing CI/CD pipelines, DevOps automation, and integrating complex multi-tenant systems.

SKILLS

Backend & Languages: TypeScript, PHP, JavaScript, Java, NestJS, Laravel, Node.js

Frontend & Mobile: Next.js, React, Flutter, Expo

Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM

DevOps & Infrastructure: Docker, GitHub Actions, Nginx, PM2, Linux (Ubuntu VPS), UFW, Fail2ban

Architecture & Tools: Monorepo (Turbo), Socket.io, Odoo ERP Customization, Baileys (WhatsApp API), Sanctum, Multi-tenant Architecture

WORK EXPERIENCE

Tarqumi — Technical Lead & Backend Engineer
Feb 2026 – Present

- Led a cross-functional software team of 15 developers, overseeing system architecture and technical delivery.
- Successfully deployed and managed over 55 production projects, implementing fast, automated **CI/CD** deployment pipelines to minimize downtime.
- Architected highly scalable systems, including a CRM/POS platform that seamlessly handled 10,000+ concurrent users.

Ashour Group — Head of Software Team & Software Board Member
Feb 2025 – May 2026

- Led the engineering department and directed the technical roadmap, transitioning the team to agile methodologies and structured **CI/CD** workflows.
- Architected scalable backend solutions and conducted extensive code reviews, ensuring high performance and security standards across all company products.

Ashour Group — Full Stack Developer
Dec 2024 – Feb 2025

- Developed and maintained full-stack applications using **Laravel**, **Next.js**, and **PostgreSQL**, improving overall system responsiveness.
- Integrated third-party APIs and payment gateways, and optimized database queries to handle increasing data loads efficiently.

7p — Backend Developer
Jul 2024 – Oct 2024

- Engineered robust backend APIs and microservices using **PHP**/**Laravel** and **MySQL**.
- Streamlined data processing and improved API response times by implementing **Redis** caching and optimizing server configurations.

Freelance — Software Engineer

2023 – Present

- Designed and delivered custom full-stack web applications and CRM systems for international clients using modern stacks (**NestJS**, **Laravel**, **React**).
- Handled end-to-end deployment on **Linux VPS** (**Ubuntu**) using **Docker** and **Nginx**.

KEY PROJECTS

W Omnichannel Hub (w-Hub) — SaaS Platform

- Built a multi-tenant WhatsApp management SaaS using a **NestJS**, **Next.js**, and **Expo** Monorepo (**Turbo**) with **Baileys** integration.
- Implemented real-time synchronization using **Socket.io** for chat inboxes, QR status, and SLA alerts.
- Configured robust RBAC, **PostgreSQL** with 18 **Prisma** models, and production **CI/CD** on a **Linux VPS**.

Care Synq (e-Hub CRM) — Marketing & Clinic Operations

- Developed a modular multi-tenant **Laravel** backend and a cross-platform **Flutter** client for managing full lead lifecycles.
- Automated activity lifecycles using **Laravel Scheduler** with complex timezone handling and **Redis** caching.
- Hardened production infrastructure using **Nginx**, **PM2**, **UFW**, and **GitHub Actions** CI/CD.

MetaTrader — Fintech Investment Platform

- Engineered a full-stack wealth management platform (**Laravel** API, **Next.js** Admin, **Flutter** App) managing real bank transfers and 12-month ROI cycles.
- Built a daily ROI engine with custom calendar rules and automated Excel/PPTX reporting modules.

AIM — Investment Tracking Platform

- Developed a bilingual (EN/AR) investment management platform with **Next.js** and **Laravel**, deployed via **GitHub Actions**.
- Integrated multi-gateway payouts (PayMint API, Binance TRC20/BEP20, Bank Transfers) and automated withdrawal batches.

Clinova — Comprehensive Clinic Management System

- Architected and developed a comprehensive B2B clinic management system covering bookings, patient records, and administrative dashboards.
- Built the backend infrastructure utilizing a modular framework, securing data endpoints, and ensuring high availability on production servers.
- Integrated robust relational databases and implemented role-based access control (RBAC) for varied medical staff permissions.

EDUCATION

October Technological University

B.Sc. in Information Technology (CS Major) — 2024 – Expected 2028 (Currently in 3rd Year)

WE Applied Technology School

Diploma in Web Development & Programming — 2021 – 2024

HONORS & CERTIFICATIONS

- 2nd Place Nationwide in Software — Egypt Science and Engineering Fair (ESEF).
- Samsung Innovation Campus Certification.
- Multiple Certifications from BIM.
