PROFESSIONAL SUMMARY

Results-driven Frontend Software Engineer and Technical Lead with over 3 years of experience in building high-performance, responsive web applications and cross-platform mobile apps. Proven expertise in leading frontend architectures for complex platforms handling 10,000+ concurrent users. Highly skilled in modern frameworks including **Next.js**, **React**, and **Flutter**, with a strong focus on state management (**Zustand**, **Riverpod**), UI/UX optimization, multi-language support (i18n), and seamless API integrations.

SKILLS

Frontend & Mobile: Next.js, React, Flutter, Expo, Tailwind CSS, Zustand, Riverpod, TanStack Query

Languages: TypeScript, JavaScript, PHP, Java, Dart

Architecture & Tools: UI/UX Optimization, WebSockets (Socket.io), i18n (next-intl), Monorepo (Turbo), Responsive Design

Backend & DevOps: NestJS, Laravel, Docker, GitHub Actions, Linux

WORK EXPERIENCE

Tarqumi — Technical Lead & Frontend Engineer
Feb 2026 – Present

- Led frontend architecture across a cross-functional team of 15 developers, establishing reusable UI component standards and design system conventions.
- Ensured cross-platform mobile and web parity across 55+ production projects, delivering highly optimized user experiences at scale.
- Directed frontend technical delivery for platforms serving 10,000+ concurrent users, prioritizing performance, accessibility, and responsive design.

Ashour Group — Head of Software Team & Software Board Member
Feb 2025 – May 2026

- Drove adoption of the frontend tech stack (**React**, **Next.js**), defining architectural standards and tooling for the engineering department.
- Mentored developers on modern state management patterns and component-driven development, elevating code quality across all products.
- Ensured pixel-perfect UI delivery through rigorous design reviews, cross-browser testing, and consistent frontend best practices.

Ashour Group — Full Stack Developer
Dec 2024 – Feb 2025

- Developed complex client-side applications using **Next.js**, consuming RESTful APIs to deliver fast, interactive user interfaces.
- Dramatically improved UI responsiveness through optimized rendering strategies, efficient data fetching, and streamlined component architecture.

Freelance — Software Engineer
2023 – Present

- Designed and delivered custom, pixel-perfect web and mobile interfaces for international clients using **React**, **Next.js**, and **Flutter**.
- Translated client requirements into polished, responsive UIs with strong attention to detail, branding alignment, and cross-device compatibility.

KEY PROJECTS

W Omnichannel Hub (w-Hub) — SaaS Platform

- Built the **Next.js** web dashboard and **Expo** mobile app within a **Turbo** Monorepo, enabling shared logic across web and mobile clients.
- Implemented state management with **Zustand** and styled the entire UI using **Tailwind CSS** for a consistent, responsive design system.
- Delivered real-time chat inboxes and SLA alert interfaces powered by **Socket.io**, optimized for high-volume WhatsApp session management.

Care Synq (e-Hub CRM) — Marketing & Clinic Operations

- Developed the cross-platform **Flutter** client (Web/iOS/Android) for managing full lead lifecycles with a unified, responsive UI.
- Built complex dynamic UI filters and interactive dashboards enabling real-time lead tracking and clinic operations management.
- Implemented complete AR/EN localization with RTL layout support, ensuring a seamless bilingual user experience.

MetaTrader — Fintech Investment Platform

- Engineered the **Next.js** Admin dashboard (**React 19**, **TanStack Query**) for wealth management, portfolio tracking, and ROI reporting.
- Built the **Flutter** mobile app with **Riverpod** state management, featuring dual-language UI and Dark/Light mode theming.

AIM — Investment Tracking Platform

- Developed the **Next.js 16** responsive frontend with a mobile-first layout optimized for financial data visualization.
- Integrated **next-intl** for full bilingual (EN/AR) support and **TanStack Query** for real-time financial data rendering and caching.

Clinova — Comprehensive Clinic Management System

- Architected intuitive user interfaces for patient bookings, appointment scheduling, and self-service clinic workflows.
- Designed comprehensive administrative dashboards for staff management, records oversight, and day-to-day clinic operations.
- Implemented role-based UI views ensuring tailored experiences for doctors, receptionists, and administrative personnel.

EDUCATION

October Technological University
B.Sc. in Information Technology (CS Major) — 2024 – Expected 2028 (Currently in 3rd Year)

WE Applied Technology School
Diploma in Web Development & Programming — 2021 – 2024

HONORS & CERTIFICATIONS

- 2nd Place Nationwide in Software — Egypt Science and Engineering Fair (ESIF).
- Samsung Innovation Campus Certification.
- Multiple Certifications from BIM.
